Superintendent Peak wants a twostory addition to the jail-there's plenty of room for captured bandits but a deplorable lack of accom modations for traffic violators.

The deceased Washington colored gem'men, who regains his senses at the door of the morgue, and puts on his hat and goes home, is in a Subcommittee Does Not Call position to appreciate exactly how Briand feels about it.

Thus far only 214 votes agains the stein and bumper have been cast in Washington, which seems to fix the boottlegger population of than had been suspected.

"For twenty years," says Tom Blanton, "Col. House named the Governors of Texas and you never heard of it," and he might have added that you never heard of the Governors either.

No nearsighted person could tell that billet doux which Ambassador Sheffield has presented to President Calles from an old-fashioned "firm but friendly note." The Republican party only goes on the warpath against Mexico when the Democrats are in power.

Sometimes Col. House must have been almost sorry that he didn't make Woodrow Wilson a Governor of Texas instead.

With Maj. Peyton Gordon reappointed District Attorney that ecommendation for a two-story addition to the jail is far too modest.

PROHIBITION HEARING Cyclist, 'Dead,' Awakes FIGHT BRINGS FLARE OF TALK IN SENATE

Cummins Defends Right to Have Public Express Opinions on Dry Law.

WALSH AGAINST PLAN AS WET PROPAGANDA

Former Likely to Put Matter to Vote in Judiciary Committee Saturday.

By ALBERT W. FOX.

Prohibition debate flared up in Senate yesterday coincident with news that a fight over public bearings is to be waged before the judiciary committee Saturday with Senator Cummins, chairman of the committee, defending his right to appoint a subcommittee to hold hearings and with Senator Walsh leading the dry forces op-posed to the hearings.

Mr. Cummins is a dry and favors

scrupulous obedience to the law, but he apparently does not see why dry senators should be so afraid of letting the public's represent-atives express opinions and give much-needed facts on the prohibition question the same as on any

the question.

He promised Senator Edge he would appoint a subcommittee, and not muzzle free expression of the popular will whether such expres-sion was for or against the Volstead act. In other words, Senator Cummins is understood to believe that frank discussion can not con-sistently be denied, and incidentally there is a prevalent belief that good instead of harm might come from giving Congress facts on a subject which admittedly re-quires as much enlightenment in the interest of legislation, as can possibly be procured.

Walsh Challenges Right.

Senator Walsh not only opposes Senator Cummins' view but chal-lenges his right to appoint such subcommittee without the sent of the majority of the judi-ciary committee. He says public hearings would serve simply to wet propaganda. chances are that Senator Cummins

will put the matter to a vote in committee Saturday.

The present line-up in the committee Indicates a Walsh victory, though it will be embarrassing for men like Senators Borah, Norris, King and others to go on record,

Brig. Gen. Lincoln C. Andrews Assistant Secretary of the Treasury and director of the country's "dry" forces, will deliver another blow at the bootleg industry tomorrow.

By this time, it was declared at the office of Gen. Andrews yester-

in some instances for the first time, on whether or not to stiffe public expression and muzzle discussion. The debate yesterday broke out in connection with the newspaper poll on modification of the Volstead act and the return of light wines and beer. "I am quite willing for the Ohio senator to instert in the Decord any polls, which are in favor of the Volstead act, or against its modification, because I do not think he wil' ever have such an opportunity."

MUSCLE SHOALS TO DATE.

Muscle Shoals has been on the congressional stage, off and on, ever since 1889. It will now be turned over to a joint committee of six-three senators and three representativescharged with the duty of finding a lessee or

lessees of the whole property by April 26, next. Between 1828 and 1838 the government made a donation of 400,000 acres of public land, with the proceeds of which Alabama coustructed the first canal and locks at Muscle Shoals. In 1899 the second great improvement was completed at an additional cost to the government of about \$3,191,000. In the latter part of the year 1917 the chief of engineers of the army directed the expenditure of \$500,000 for the beginning of the construction of lock and dam No. 2. In February, 1918, a further expenditure of \$12,630,000 was authorized for the completion of this dam.

In addition to these expenditures, the government has constructed two nitrate plants at the shoals and purchased the nearby Waco quarry for use in the manufacture of fertilizers, Nitrate plant No. 1, which was authorized in 1917, is equipped for the manufacture of gas, ammonia, ammonia oxidation, acid concentration, ammonia nitrate and power. It cost the government around \$12,887,000

Nitrate plant No. 2 has a capacity of 110,000 tons of grained ammonium nitrate a year. Its various subdivisions are equipped to manufacture calcium carbide, cyanamide, liquid air. ammonia gas, nitric acid, ammonium nitrate and power. This plant, together with the Waco quarry, cost the government about \$67,555,000. All told, the government has already invested 400,000 acres of land and more than \$122,000 .-000 in cash in Muscle Shoals.

The joint committee will act entirely outside the executive, and will report to Congress. The committee can consider any bids, whether they are separate or combine the power and fertilizer features of the problem. The only requirement is that the offers shall not be less remunerative to the government than the bid made by Henry Ford several years ago. In the opinion of many legislators Mr. Ford's bid was not as good as it had been represented. They believe that separate bids, relating to power and fertilizer, will prove most advantageous by insuring the development of both factors to the extent of the capacity of the Muscle Shoals plants.

Any bids recommended by the committee must be passed upon by Congress.

There isn't much wrong in a country that had rather leave the change than carry so

MAJ. GORDON'S NOMINATION.

Maj. Peyton Gordon has been renominated by President Coolidge for another term as United States district attorney. It is a derecognition of duty well done. Maj. Gordon has held the office of district attorney since August, 1921, having been appointed by President Harding. In his more than four years of service he has had many difficult legal matters to engage his attention in the interest of the government, and numerous cases to prosecute before the United States courts. He has invariably invested his work with intelligence and energy and has shown remarkable capacity for disposing of a vast amount of work. He has the confidence and respect of the public and the members of the legal profession. There is no doubt that the Senate will promptly confirm his nomination

CRITICIZING THE COUNCIL.

Lieut, Col. J. Franklin Bell, engineer com missioner, deplores the attitude of delegates to the Federation of Citizens Associations and others in publicly resenting any criticism of the citizens' advisory council. His position is directly opposite to that taken by the federation which at its last meeting adopted a resolution condemning criticism of the council and its plan of organization and procedure. Praising the council for the valuable service it has performed in giving advice on District legis lation as well as in other matters, the engineer commissioner expresses the opinion that the council can be improved, and at the same time states that he has no fault to find with those who criticize the council. "Any institution or individual that can not stand criticism should get out of public life," Col. Bell said. "When a person or body is criticized it is alive. If is not being talked about, it is dead."

It would be well for the members of the council and delegates to the federation to heed the commissioner's advice. Criticism makes for progress. No just cause has ever suffered from criticism, and no worthy political body has ever been killed by it. Commissioner Bell declares that, in his belief, the more the council broadens out the better it will become, and that it can be made a more important and more responsible body by enlarging its constituency. The federation, he says, is essentially and properly a propaganda agency, whose function it is to demand public improvements and agitate to get them. It is unfortunate that the federation should take a stand against a wider participation by the members of the citizens'

council or that it should condemn citizens for promote the welfare of either the council or people of Washington. A better one is to look for flaws and try to correct them. Under the present system 98 delegates, comprising the Federation of Citizens Associations, are the only ones who can vote for members of the advisory council. It would be much more representative of the city's sentiments and interests to have members of all citizens' associations take part in the election.

The advantage of a budget is that you know in advance how much too much you are going to spend.

A LIBEL ON CONGRESS.

Who is this Tom Taggart, who charges memers of Congress with cowardice on the prohibition question? Is it the Tom Taggart who used to be senator from Indiana? If so, he ought to know better than to utter a whole sale libel on the American Congress. There is not a member of Congress who does not have decided views on the liquor question, and the courage to express them. These views may be of two varieties, one for public and the other for private consumption, but so long as they are tenaciously held and consistently practiced, it will be difficult to prove the charge of cowardice.

Can Tom Taggart name a member of Congress who voted for the Volstead act and who is now afraid to proclaim himself a public champion of the act? By their votes ye may know them. Can Tom Taggart name a member of Congress who is afraid to take a drink among his private friends? If not, let him forever hold his peace.

If he doesn't seem to do much, he may be a brother of the wife of the boss or he may be the efficiency expert.

A FITTING CELEBRATION.

Congress has before it a joint resolution proiding for the participation of the government, through Congress, in the celebration of the 150th anniversary of the adoption of resolutions by the Virginia convention of 1776, instructing the representatives of Virginia in the Continental Congress to propose a resolution declaring the "United colonies free and independent States, absolved from all allegiance to, or dependence upon, the crown or parliament of Great Britain; and that they give the assent of this colony to such declaration and to whatever measure may be thought proper and necessary by the Congress for forming foreign alliances and a confederation of the colonies.

Pursuant to this action of the Virginia conention, the Continental Congress adopted a esolution offered by Richard Henry Lee, of Virginia, on June 29, 1776, declaring the colnies free and independent and absolved from all allegiance to the British crown. This was followed by the Declaration of Independence.

In commemoration of the action of the Virginia convention. Congress proposes to join with Williamsburg, Va., in the celebration of the 150th anniversary of that event, on May 15. 1926. For this purpose, it is very properly by a committee of ten-five senators and five

STATES' RIGHTS.

Opposing an appropriation of \$1,232,079 by Congress for the welfare and hygiene of maternity and infancy. Representative Tucker, of Virginia, recently made an illuminating speech on the Constitution and the respective rights of the States and of Congress.

Regardless of the high purposes of such leg islation, the speech of Representative Tucker is an interesting and instructive discussion of the birth of the Constitution and the essential objects of its framers. The background of the speech and argument is the extension of Federal activity at the expense of the States.

anxiety over this widening of Federal functions and the intrusion of the government into the province of the States. In the famous case of McCullough vs. Maryland: Chief Justice Marshall, who "breathed life into the Constitu-

That there is a plain repugnance in con ferring on one government—the Federal government—a power to control the con-stitutional measures of another, which stitutional measures of another, which other, with respect to those very measures, is declared to be supreme over that which exerts the control, are propositions which are not denied.

In his budget address to Congress on June 30, 1925. President Coolidge referred to this undesirable tendency to widen the activities and functions of Congress. He said:

I am convinced that the broadening of this field of activity is detrimental both to Federal and State governments. Efficiency of Federal operations is impaired as their scope is unduly enlarged. Efficiency of State governments is impaired as they re-linquish and turn over to the Federal government responsibilities which are rightfully theirs.

This is a subject of increasing importance and deserves serious thought. A strong central government does not necessarily mean a surrender of legitimate State rights and powers Obviously the States should be left to act independent of the government, unless such activity contravenes the Constitution and imperils the Union.

ILL-CONSIDERED LEGISLATION.

It is doubtful if there is another law on the tatute books which has caused so much annoyance and unnecessary bother as that which was signed on the 22d day of September, 1922, at the instance of and ostensibly for the benefit of the women of America. That act was sunposed to define the political rights of women in such a way as to make them absolutely inde pendent of their spouses in matters political. and it has accomplished its purpose with a

The latest case to come up for general attention is that of Mrs. Markin, the wife of Jacob Markin, a Russian born citizen of New York city. The Supreme Court on Monday denied Markin's appeal for a review of the action of the immigration authorities wherein they held that under the so-called "Cable act" of September, 1922, his wife is inadmissible as an immigrant, because Markin became a citizen by naturalization after the enactment of

associations in the election of members of the that law. Had he acquired his citizenship on the 21st of September, his wife would, under indulging in criticism. This is not the way to the old law, have also acquired citizenship. But by deferring final transfer of allegiance the federation, much less the interests of the until the Cable act was incorporated into the statutes Mrs. Markin remains Russian, and as such must await the opportunity to join her husband until there is a "vacancy in the Russian quota."

This is only one of hundreds of instances wherein the law which was framed in the interest of women has worked great hardship. 'The files of the office of the commissioner general of immigration are crowded with papers relating to cases wherein citizens complain that the interpretation of the Cable act has worked injustice and has brought great distress, but the law is plain in its language, and while the commissioner is willing to admit the hardships which have followed its enactment he is powerless to afford the relief asked. Until Congress acts on the bills designed to remedy the defects in the immigration laws the situation must remain unchanged.

You can still buy the old-fashioned good kerosene, but they sell it at filling stations and call it gas.

PROTECTING THE CRAB.

The Virginia legislature has shown commendable enterprise in pushing legislation for the protection of the crab. Two bills have been passed by that body, one to provide for a sanctuary for mother crabs at all times of the year in lower Chesapeake bay, where dredging will be prohibited, and another to extend the closed season for catching mother crabs 45 days by setting it forward from June 15 to May 1, with the season ending September 1 as at present. The legislation is in harmony with recommendations made by the bureau of fisheries and Maryland and Virginia State officials.

Investigations conducted by Federal and State authorities in the last year disclosed that unless drastic measures were taken it would not be long until the crab as an article of food would be virtually extinct. In the last ten years crab flakes and crabs cooked in a variety of ways have become so popular on restaurant menus that the demand has not equaled the supply, which has led to so great an increase in the number of dredgers that the crab colonies are becoming rapidly de populated. The Maryland legislature will not be in session until next January, but it is expected to enact legislation similar to that passed by the Virginia legislature. Evidently the cry of the crab has been heard, and soon he will be provided with the necessary pro

President Coolidge has advised representatives of the American Legion that it will not be necessary to await the action of Congress before establishing a guard over the tomb of the Unknown Soldier in Arlington cemetery The President contends that the War Depart ment has ample authority, and a permanent guard will be mounted. The American Legionnaires are to be congratulated in thus securing for their comrade the respect which should have been shown his memory without even executive action. But it seems rather late to proposed that Congress shall be represented have discovered that the grave is desecrated almost every day of the week. Passengers on the "rubber-neck wagons" have been notorious offenders. The flat slab of granite which marks the shrine upon which have been placed more wreaths than were ever before placed on the tomb of an American soldier, has been used as a convenient resting place by tourists as they debarked from the sightseeing buses, and scarcely a day has passed since that shrine was dedicated without a thoughtless party of picnickers squatting thereon as they ate their lunches and scattered the debris thereof. The guard should be mounted without delay

> Delegates to the Federation of Citizens Associations at their last meeting adopted a resolution condemning criticism of the advisory council and its plan of organization and procedure. It is the privilege of every man to criticize those who are charged with control over public affairs. Progress is made by criticism. The unusual spectacle of delegates to the federation voting against the right of their respective member associations to pass judgment upon the council might indicate apprehension that its existence is endangered

Years of Experience

NENERAL ELECTRIC built its first commercial electric Trefrigerator years ago. Since that time, these refrigerators have been used in hotels, clubs and storage warehouses as the most reliable method of applying electricity to the preservation of food.

Skilled engineers have adapted the same proved principles of design to a household electric refrigerator-positive in operation, entirely automatic, economical to run and ready for years of service without attention. Thus the experience of General Electric has perfected a new convenience for the home.

The BIRTHDAY OF THE TELEPHONE

o young men, hard at work in a stuffy Boston garret-Alexander Graham Bell and his assistant, Thomas A. Watson-the time, March 10, 1876, an outstanding date in the history of communication, for this was the birthday of

Just fifty years ago today the first telephone message was sent. After exhaustive research and experiment, young Bell had at last hit upon the invention which was to change the entire existing order of things.

Think of a world without telephones! Fifty years ago there was but one. Today in the United States alone the Bell Sys-, tem serves nearly 17,000,000 telephones—one for every seven of its inhabitants.

"Mr. Watson, come here, I want you." These were the first words spoken by telephone.

On that memorable March 10th, fifty years ago, one message was sent. Nowadays, an average of 67,700,000 calls are sent each and every day of the year. Every city and town throughout the length and breadth of the land has its telephone service.

Each user of Bell service can send his voice across the state or across the nation as easily as across the street. The service of the Bell System is a universal service of com-

munication, ever ready to serve the nation's needs. Born in a garret, the telephone has reached a great estate on this, its fiftieth anniversary.

MARSHALL LAWYER ONCE HAD FOREMAN OF JURY AS CLIENT

Discovery Halts the Trial of Philadelphia Man on Murder Charge.

WIFE OF PRISONER ILL; IS DEFENSE WITNESS

Father, However, Insists She Cannot Be Disturbed; Delay Is Refused.

Philadelphia, March 9 (By A P.) .- The trial of David L. Marshall, charged with the murder of Anna May Dietrich, was halted this afternoon when it became known that Abraham Wernick, his attorney, once had represented Joseph Mooney, foreman of the jury. The trial was adjourned until 10 o'clock tomorrow by Judge Harry S. Mc-Devitt, who said later in his cham-

hers that an intricate point of law had arisen which he was called upon to decide.

The judge would not say what the point was, but it became known that Wernick's firm had handled a that Wernick's firm had handled a legal matter with which Mooney was identified. When examined yesterday prior to becoming a juror, Mooney had said that he did not know anybody in the case.

Mrs. Marshall III.

Eight jurors had been selected when the noon recess was taken to-day in the trial of Marshall, who is charged with murdering Miss Anna May Dietrich and dismembering

her body.

Mrs. Jennie Marshall, wife of the accused man, is "away, under a physician's care," said her father Frederick C. Kinsell, today. "She can not be disturbed for anything,'

can not be disturbed for anything, he declared.

It was suggested that she might be instrumental in saving her hus-band's life, as Marshall's attorney had said he depended on her as an

had said he depended on ner as an important witness.

"She can not be disturbed," Kinsell reiterated. "The man may want my daughter to come, but I am under the doctor's orders not to disturb her, and I care only about her end of it, anyhow.

Delay Refused.

When the trial was resumed to-day, Abraham Wernick, counsel for the accused, asked for a continu-ance for one month so as to allow the influence of certain newspaper articles concerning the trial to die

down. The request was denied.

Mr. Wernick displayed to the court New York and Philadelphia illustrated newspapers which conillustrated newspapers which con-tained statements that when coun-sel yesterday asked permission to withdraw Marshall's plea of not guilty he did so in order that the prisoner could plead guilty and throw himself on the mercy of the court. Counsel said that such state-ments precluded a fair trial.

When Mr. Wernick asked permis When Mr. Wernick asked permission yesterday to withdraw the plea of not guilty he stated he wanted Marshall to stand mute to the indictment, adding that the not guilty plea was made through an oversight.

British Film Studio Halts Work for Tea

Macready's Altitude Test Is Postponed

Dayton, Ohio, March 9 (By A. P.).—Lieut. John A. Macready postponed his attitude test flight today after adjustment of the supercharger on the motor of his special plane took more time than had been expected. After this done, cloud banks appeared, pre-venting him from going aloft. He will make the attempt as soon as conditions are right.

KEEP LOOKING YOUNG

It's Easy-If You Know Dr. Edwards' Olive Tablets

The secret of keeping young is to feel young—to do this you must watch your liver and bowels—there's no need of having a sallow complexion—dark rings under your eyes—pimples—a bilious look in your face—dull eyes with no sparkle. Your doctor will tell you 20 per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards, a well-known physician in Ohio, perfected a vegetable compound mixed with olive ail to act on the liver and bowels, which he gave to his patients for

Dr. Edwards' Olive Tablets, the substitute for calomel, are gentle in their action yet always effective. They bring about that natural buoyancy which all should enjoy by coning up the liver and clearing the system of impurities.

Dr. Edwards' Olive Tablets are known by their olive color. 15c, and 30c.

Was It Love-or Fascination?

70)HEN one is nearly twenty and wants to get ahead in the world, life as a manicurist in a barber shop is prosaic and dull.

Or, at least, so thought Angelique! Holding men's hands all day long wearied her. Their foolish flattery sickened her. And they were all alike -those men. She began to doubt whether she would ever meet a man she could love with all of the devotion she felt herself capable of.

But that was before she met Carlos. Carlos was an exhibition dancer. who also gave lessons. He came to be manicured every day-and soon Angelique, who loved music and dancing, began to accompany him to dances on his free evenings.

When she danced with him. and the music throbbed and called with its alluring notes, she felt that she could close her eyes and dance on and on with him forever. That was the beginning of her romance with Carlos.

Poor innocent, inexperienced Angelique! How little she knew about life and the ways of men! When Carlos told her one day that his woman partner was about to be married, and asked Angelique to take her place, the manicurist's heart set up a terrific hammering of excitement. To go on the stage with Carlos, and rise with him to heights of fame-she could hardly believe her good fortune.

The fact that Carlos was an absolute stranger to her-that she knew nothing of his past, his associates, his private lifedid not enter her excited mind. So when he invited her to his private studio to learn all the latest steps, she fairly flew to get there.

That visit to Carlos' studio was the opening act in a drama that no playwright could have written, that no novelist could have imagined, that no "movie" plotster could have created for the screen.

It was a swift, heart-gripping, true-life drama that was to sweep the highest and the lowest of society into its cyclonic whirl. It

A Big Prize in True Story's

\$50,000.00 Contest

Three hundred and eleven men and women are going to participate in cash prizes ranging from \$5,000 to \$100, and aggregating \$50,000 in all, to be awarded by True Story Magazine in exchange for true stories. Why not win one of these wonderful prizes?

This is the most remarkable offer ever made. Never was there such a chance for men and women who are not professional writers to cash in handsomely on their life experiences.

Everywhere there are men and women who have lived at least one story which, because of its simple truth, because it goes beneath the surface of life and frankly reveals the joys and sorrows of human experience is more helpful, more inspiring, more powerfully thrilling than any fiction story ever written.

In making this unusual offer, it is our special desire to interest all classes of people—everywhere.

True Story is able to maintain indefinitely its present high plane with the many splendid stories it now receives, but if we can raise the quality of the stories even higher it is our desire and intention to do so. It is the best, most polgnantly interesting, most thoroughly helpful stories that we desire, and we do not want a single life experience to escape us.

For rules and conditions of this memmoth Contest turn to page 63 of True Story for April.

was a desperate conflict of human love, hate and revenge that was to seize Angelique in its merciless grip, fling her high into the clouds of reckless laughter, and then hurl her with crushing force down, down onto the rocks of fear and despair.

Never has the terrible price of ignorance been made more vivid, more compelling, than in this astounding true-life narrative entitled, "Out of the Ruins," in April True Story Magazine. Never was there written a more powerful warning against forming friendships with people that one knows nothing about.

Other Heart-Stirring Stories In the April Issue Are:

"Sunshine and Shadow"-With only the dull grind of a factory to fill her days, Tessie longed for something to happen-to vary the deadly monotony of life. Then something did happen. She fell in love with Eddie Novak—and that moment the underworld had her in its grip. A thrilling epic of grim courage that you won't forget for many days.

"Not Always What You Think"-Even a good girl who is fighting alone against the world may find herself forced to choose between failure, loneliness and hunger and luxurious comfort "at a price." Read this girl's story, and then decide whether you would have made the choice she made.

"A Wife's Temptation"-With her husband engrossed in his business affairs - it was during just such a period of gloom - fate introduced another man into the life of this wife -a man who fascinated her in spite of herself. At first she thought it only a harmless flirtation, but-well, let her tell the story. It contains an invaluable lesson for every reader, whether married or not.

Read Also In This Wonderful Issue:

"Flame of Love" "Her Golden Cage"
"The Clutches of the Demon"
"The Primrose Trail" "Blind Ways"
"Wasted Love" "Love-Starved" Wives at Auction"

"The Unwanted Woman"
"When Souls Are Tried"
"A Wife's Awakening"
"The Heart of Collette"

BEHOLD, here is a girl who has discovered that men "pet" mewspapers and am able to talk on any matter that may be discussed. I mewspapers and am able to talk on any matter that may be discussed. I am always ready to acknowledge that always known. The fascinating woman can always afford to be aloof. She is never subjected to any form of demand on the part of her masculine acquaintances. She is the one who dictates the terms upon which a man may remain in her vicinity. It is little hollow-head who can neither talk, think or reason, who finds it necessary to allow a man to amuse himself in any way he wishes. Her other alternative is to see him walk off leaving her to wonder what it is all about. Such a girl cannot of course understand what some other girl does to hold the interest of men. She never seems to realize that every woman and any woman can "pet"—but some women can hold not one "pet"—but some women can hold not one "pet"—some women can hold not one "some women can hold the interest of men." The pro-posal is that a foreman designated for the purpose stand over the workers at the wash basins and personally see that each person washes his hands before the noon meal and AVE you had a dream?"

The contest was set for morning. This question was asked of Champlain each morning while he was making one of the most famous trips of his life. Simple, natural ways now are given first place by authorities. Modern beauty culture has largely discarded the artificial ways of yesterday.

The following rule is being widely upged by experts. It is credited with bringing more women beautiful com-plexions than any other method known—just keeping the pores clean and the skin healthy, with the gentle olive and palm lather of Palmolive, used this way:

DO THIS - NOTE HOW YOUR SKIN IMPROVES

YOUR SKIN IMPROVES

Wash your face gently with Palmolive Soap, massaging it softly into the skin. Rinse thoroughly, first with warm water, then with cold. If your skin is inclined to be dry, apply a touch of good cold cream.

Do this regularly, and particularly in the evening. Use powder and rouge if you wish. But never leave them on over night. They clog the pores, often enlarge them. Blackheads and disfigurements often follow. They must be washed away.

Follow these rules day in and day out. Your skin will be soft and lovely—naturally colorful and clear.

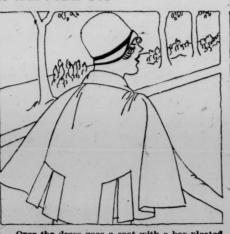

Do not use ordinary soaps in the treatment given above. Do not think

panies that have been most active in Mexico are turning to the South American fields for exploitation.

100,000 shares of class A stock and issuing 100,000 shares of additional This movement is given as the cause for the strength of General Asphalt, which is expected to figure in a big combination now being negotiated in London by the representative of a big banking house, that will be outstanding after the negociated in London by the representative of a big banking house, who sailed from New York last Saturday week. One of the units of the combination is the Colon Development Co., in which Royal Dutch interests have 75 per cent. This is one of the largest concessions in Venezuela and General Asphalt as a 15 per cent royalty interest. Up to a few years ago, Royal Dutch and General Asphalt were joint partners in Venezuela oil lands, but an arrangement was made whereby Royal Dutch repaid Asphalt for its share of development expenses to that time, amounting to several million dollars and gave General Asphalt a 15 per cent royalty interest. For this payment Asphalt gave up its partnership interests.

Efforts are now under way in London for one of the large American oil companies to acquire the Royal Dutch interest in Colon Development as well as that of the Carib Syndicate. Should this be consummated, development work on this property would become more active. Among the interests recently active in General Asphalt.

CURB MARKET REVIEW. CURB MARKET REVIEW.

New York, March 9 (By the Associated Press).—Prices in today's curb market pointed upward in reflection of a gradual restoration of confidence. There were still a few soft spots, particularly in the public utilities, but the offerfings of distressed holders were generally well absorbed.

Oils displayed a distinctly stronger undertone, with buying influenced by production of the decrease of the production of the decrease of the production last was decreased by rather general predictions of an unusually heavy increase in gasoline consumption this year as a result of the record-breaking number of automobiles in use. Vacuum crossed 109 for a net spain of over 2 points, and Standard Oil of Kentucky, Gulf and Humble when issued basis, held firm.

Industrial stocks showed a tendency to rally briskly on the lifting of self-levels, 14.00; shippers took 10.400; established to week specification of the lifting of self-levels, 12.000.

Across the Hall

THIS fact about The South-Tern Building would justify higher rents. Yet it is one reason why rents here are so moderate. "Across the hall" from your office—no matter what floor convolved matter what floor or which wing—you'll find another firm of character. This neighbor-prestige has rental value; it is appraised in dollars and cents just as the "good will" of a company is evaluated. But, your neighbor across the hall remains a Southern Building tenant year after year. Such regularity of tenancy, with re-leasing minimized, allows Southern Building rents to be

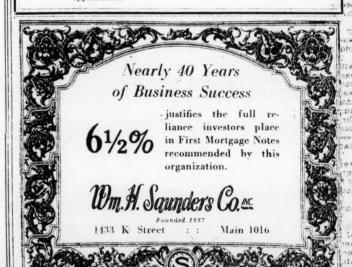

moderate. The manager, upon your phone call, will arrange an inspection appointment.

CALL FUNDS ARE EASIER

Special to The Washington Post. New York, March 9.—A decidedly strong tone was imparted to the stock market today by impressive buying of a variety of issues. The firmness of prices all around indi-cated that confidence gradually was being restored in speculative quarters, and it was evident stocks no longer were being pressed for sale, either by distressed holders or by bearish professional traders. Signs of renewed operations, on the other hand, were discernible. Doubtless the recovery was stimulated by the low rates quoted in call money, of which the supply continued most ample. being restored in speculative quar-

Milligan Out Of Welter Class

British Champion Says He Can No Longer Make Weight.

Plans to Engage as Middleweight In Future.

EW YORK, March 9 (By A. r.) Tommy Milligan of Scotland, today forfeited his right to le Mickey Walker for the world's welterweight championship when he informed the State Athletic commission that he could no longer make the 147 pound weight limit in this division.

Milligan announced his decision through his manager William Ames, after the commission had designated him as Walker's logical challenger and recommended that they be matched for the world's title in Madison Square Garden on May 7. Madison Square Garden on May 7.
Milligan, according to Ames, will renounce the European welter-weight championship which he now holds. The Scotchman henceforth will confine his boxing to the middleweight division, in which he also

is European titleholder. T HE commission recommended that two other persistent welterweight challengers, Willie Harmon, of New York, and Joe Dundee, of Baltimore, be matched on May 7, to determine which one is most entitled to a bout with Walker. The winner will have the commission's support in seeking a title match.

The commission announced that would not sanction a proposed match at Madison Square Garden in May between Tiger Flowers and Paul Berlenbach, holder of the world's middleweight and lightheavyweight championships, respectively. This is in line with the commission's general policy of prohibiting champions from fight-ing above the weight limit of their

Somehow the prevailing theory now is in commercialized sport that no headway can be made without a figurehead, and the more commercialized the venture the more essential the need of a figurehead seems "Large Bill" Edwards. for instance, is not obligated to take over any of the worries and cares of the men who hope to make money out of football. He is more likely to give them some additional worries, but

One thing that may be said in behalf of the selection made by the firm of Pyle & Grange, wholesalers and retailers in the sport of football, is that they chose a man who at least has some detailed knowledge of the sport that he is slated to super-vise. Judge Landis' qualifications at the time of his eleva-tion consisted of the ability to assume a striking pose and wear an early model hat without blushing.

The fundemental reason for the selection of "Large Bill" Edwards, of course, is that the promoters of the new football league hope thereby to convince the cash customer that professional football is strictly on the "up and up" and that the boys will not "understand" each other prior to the opening of hostilities. It is "Large Bill" Edwards' task to impress the cash customer with the ferocity of the combatants and their extreme willingness to die if need be for professional football and "Large Bill" Edwards. The fundemental reason for

will be some one's duty in the new league, presuma-bly not "Large Bill" Edwards, to play the role of gridwards, to play the role of grid-iron Christopher Columbus each year and find some mag-net to attract the cash cus-tomer. "Red" Grange pos-sessed the power of attraction to an extraordinary degree, but no successor to the Illinois flash has yet been sighted on

The Dodgers are an elderly ball team. They are so elderly that one of the young baseball writers assigned to cover the camp, looked over Joe Kelly, of the old Balti-more Orioles, and "Iron Man" Mc Ginnity, who were brought down as coaches, and remarked that with a few years of seasoning these re-cruits might be ripe for the Dodg-ers. HOFF RENEWS TRAINING GRIND

Norwegian Works In Preparation For All-Events.

HARLIE HOFF, after boosting hardlie HOFF, after boosting his own record up yet another notch in the pole vault at Chicago Saturday night, was doing business back at the old stand yesterday. Which means he was out at Georgetown practicing for his coming all-around test at the coming all-around test at the Knights of Columbus games next

Tuesday night.

While the match is not billed as such, yet it will go a long ways to ward determining the best versa-tile track and field performer of the world. The withdrawal of Tony Plansky from the field leaves Emerson Norton and Harold Osborne as Hoff's competitors for the title. And it would indeed be a difficult task to find a more accomplished pair of performers than Norton and

Yesterday Hoff did a little bit of everything that he will be required to do next Tuesday. He skipped over the burdles, put the shot, broad jumped and high jumped, practiced vaulting take-offs with-out having the bar up and con-cluded his drill with several laps around the track. He was accompanied in his exercises by Norton.

Other members of the Hilltop track squad did little but limber up and jog around the track a few times. Several of them, however, worked a little more strenuously than the others for they also will participate in the K. C. games.

The Blue and Gray performers who will go to New York probably will be, Walter Gegan, in the spe-cial half mile; the mile relay team, the personnel of which may changed after time trials are held later this week, and Ted Weisner, a freshman, who is entered in the high jump.

booked for March 21.

The meets will be sanctioned by the A. A. U., and will not only include registered athletes, but novices as well, which fact is in keeping with the plan of the Aloysius club to stimulate not only long-distance running, which has long been the forte of the club, but dash events as well

The program outlined last night calls for the following events: 50yard dash for runners from 18 to 25 years; 100-yard dash, open; 300-yard dash, open; 1,000-yard run for novices and one-mile run. A distance race will also be held each Sunday with the committee, composed of Dan Hassett, Tom Probey and Yank Robbins regulating the length.

is planned to have these Sunday meets lead up to a grand field day meet to be staged the latter part of May.

Members of the committee are Dan Hassett, Aloysius, chairman; Tom Probey, of Aloysius; Harry Knight, Carl Knight and A. E. Weeks, of Washington Canoe club, and Yank Robbins.

'C' Club's Annual Meet Booked for May 15

The annual field and track meet of the "C" club, composed of Central High letter-men, will be held this year on May 15, and will, as usual include entries from practically every high and prep school in the vicinity.

The graded schools will again compete, but events will only include track events for two representatives from each school.

Eagles and Stantons Meet Again Sunday Minnicks to Captain

One of the best attractions of the current court season will take place next Sunday afternoon when the Anacostia Eagles will play host to the Stanton club in the second game of a three-game series, which will have an important bearing on the unlimited championship. The last meeting resulted in a memorable contest in which the Eagles succeeded in winning by a 5 point margin after playing an extra fiveminute period.

T is suggested at times that the courses taken by some of the leaders in the world of college sports are largely athletic and that credits are allowed in football, baseball, basketball and track. This viewpoint is especially prevalent among the same group of persons who think that the "overemphasis" of football is the nation's great-

est menace.

The midyear examinations at Princeton tell a different story. Apparently there is one insti-tution of learning, at least, in which the athletes are forced to visit the classroom occasionally, for seven of the sports captains at Princeton not only

STRANGE as it may seem Princeton's case is by no means exceptional. There are numerous other colleges throughout the United States where students are obliged to where students are obliged to carry a course or two in addi-tion to their athletic work. The athlete, more often than not, is doing more to develop his brain than the man who picks out snap courses and neglects his mind and both.

Greb will find it hard to go back along the path he has come and pick up the strength and sinew that he left behind him one, two, three and five years ago. Unaccustomed to real training for years, Greb may find his venture into the straight and narrow has been begun too late.

It may be that Greb will be able to change the verdict that gave Flowers the middleweight title, but when he speaks of defeating Berlenbach, too, Greb is covering a lot of territory. BONDS RALLY SLOWLY WITH PRESSURE LIFTED

D. & H. Convertible 5s Lead Rail List Upward—French Loans Recover.

INDUSTRIALS ARE DULL

New York, March 9 (By the Associated Press).—Selling pressure was lifted from the bond market today, but prices made little headway

day, but prices made little headway in recovering from their recent reaction. Curtailment of activity and further narrowing of fluctuations intensified the market's dullness.

The most conspicuous feature of the day's trading was the rally in French obligations, which followed the announcement that a new Briand cabinet probably would be formed to succeed the one which fell last week. Gains of 1 to 2 points were general throughout this list, with the government's 7s and list, with the government's 7s and 712s giving a good demonstration

strength. Railroad liens resumed their upward movement under the leader-ship of Delaware & Hudson con-vertible 5s, which jumped more than 3 points following an advance of almost 9 points in the stock. The activity was based on the belief that an early move will be made to

that an early move will be made to carry out the segregation of the road's coal properties along plans which were tentatively formulated about a year ago, but which were held back by the anthracite strike.

With the Van Sweringens' plans for a revision of the Nickel Plate merger terms still unrevealed, activity in the bonds of the companies involved slackened today. Chesapeake & Ohio convertible 5s fluctuated within a 2-point margin and closed virtually at last night's final figure. Most of the Erie bonds were higher. Fractional gains were renigher. Fractional gains were re-corded by other rails, including Atchison, Northern Pacific, New York Central, Frisco, Southern Pa-cific and New Haven issues. Trading interest was at a low ebb in the industrial group, although Rogers Brown Iron 7s rallied al-most 4 points on a few sales. higher. Fractional gains were re-

NEW YORK COTTON.

NEW YORK COTTON.

New York, March 9 (By A. P.).—
Much of the steadiness which developed in today's cotton market was due to covering of March contracts and switching from old to new crop positions. In the late afternoon old crop months were 13 to 15 points het higher and new crops 5 points higher. The close was practically top for the day and 3 to 13 points net higher. Hecause of steady cables and reports that the Master Spinners Federation had recommended an increase of 4½ hours weekly in the American section at Lancashire, the market opened steady at 4 to 9 points higher. It reacted about 5 to 7 points from the reacted about 5 to 7 points from 12 reacted about 5 to 7 points from 13 reacted about 5 to 7 points from 14 to 18 64 and October Ma 17.27, but received good supportfrom shorts in March, as well as commission houses, Liverpool and Wall street. Business was rather dull around midday, but increased as the afternoon progresed. getting further support from Wall street interests in the late affernoon, accompanying an upturn in the stock market, which caused May to reach 18.77 and October 17.35.

Considerable interest was taken in the figures on world's consumption and stocks of American cotton for the first half of the present cotton year as calculated by the International Federation of Master Cotton Spinners and Manufacturers association. Consumption was placed at 6,87,009, compared with 7,022,000 the previous six months, and 2,324,000 January 31, 1925.

Much of the Southern news during the day was bearish, including reports of lessened mill activity in North Carolina, continued favorable weather for farm work and private advices to the effect that spot cotton in the Eastern belt was offered today at the easiest basis of the season.

In the local goods market complaint was made that buyers showed little interest even at concessions and appeared to expect still lower prices for the raw material.

Exports today were 14,736, making 5,137,244 so far this season. Port receipts, 29,179; United States port stocks,

Women's clothes should be advertised by styles and fashions and not by price, Miss Helen Langdon Cass, New York stylist, told the Ad-

vertising club at its luncheon in the City club yesterday. Women buy clothes to make themselves beautiful, or to add to their beauty, and not because there is a sale of clothing or because they see low prices in advertisements, she said. It is really advertising that tells of the style and fashion of the clothes that leads women to buy and that directs their attention to something that will satisfy them, Miss Cass said.
